

**CS SERIES**  
Intelligent and efficient air

**/// ROTARY SCREW**

**Benefit from** a choice of configuration options // intelligent electronic controls // low noise levels // space saving and energy efficient design // engineered for Australian conditions // genuine Sullair parts and national service coverage

### Intelligent electronic control

Sullair's CS range of compressors are fitted with the latest technology controllers which provides sequencing of multiple compressors to ensure even operation and uninterrupted production.

### Deluxe monitoring

Monitoring of all essential data is shown on the display and to ensure smooth operation many data points can be taken from the unit into remote monitoring systems using modbus. Pressure is controlled by a transducer to minimise off load running and reduce over compressing, this ensures optimum energy savings.

### Better for environment

Designed with noise and service in mind, the CS range is extremely quiet due to canopy and component design. The CS range is ideally suit to busy factory environments.

### Energy efficient motor

All motors are MEPS2 compliant increasing energy efficiency and lowering your carbon footprint. The Sullair air-end is designed to give maximum output with minimum power consumption giving the CS range of compressors a superior energy advantage. All units are supplied with Sullube a biodegradable lubricant that has a life of up to 8000 hours.

### Compact and silent

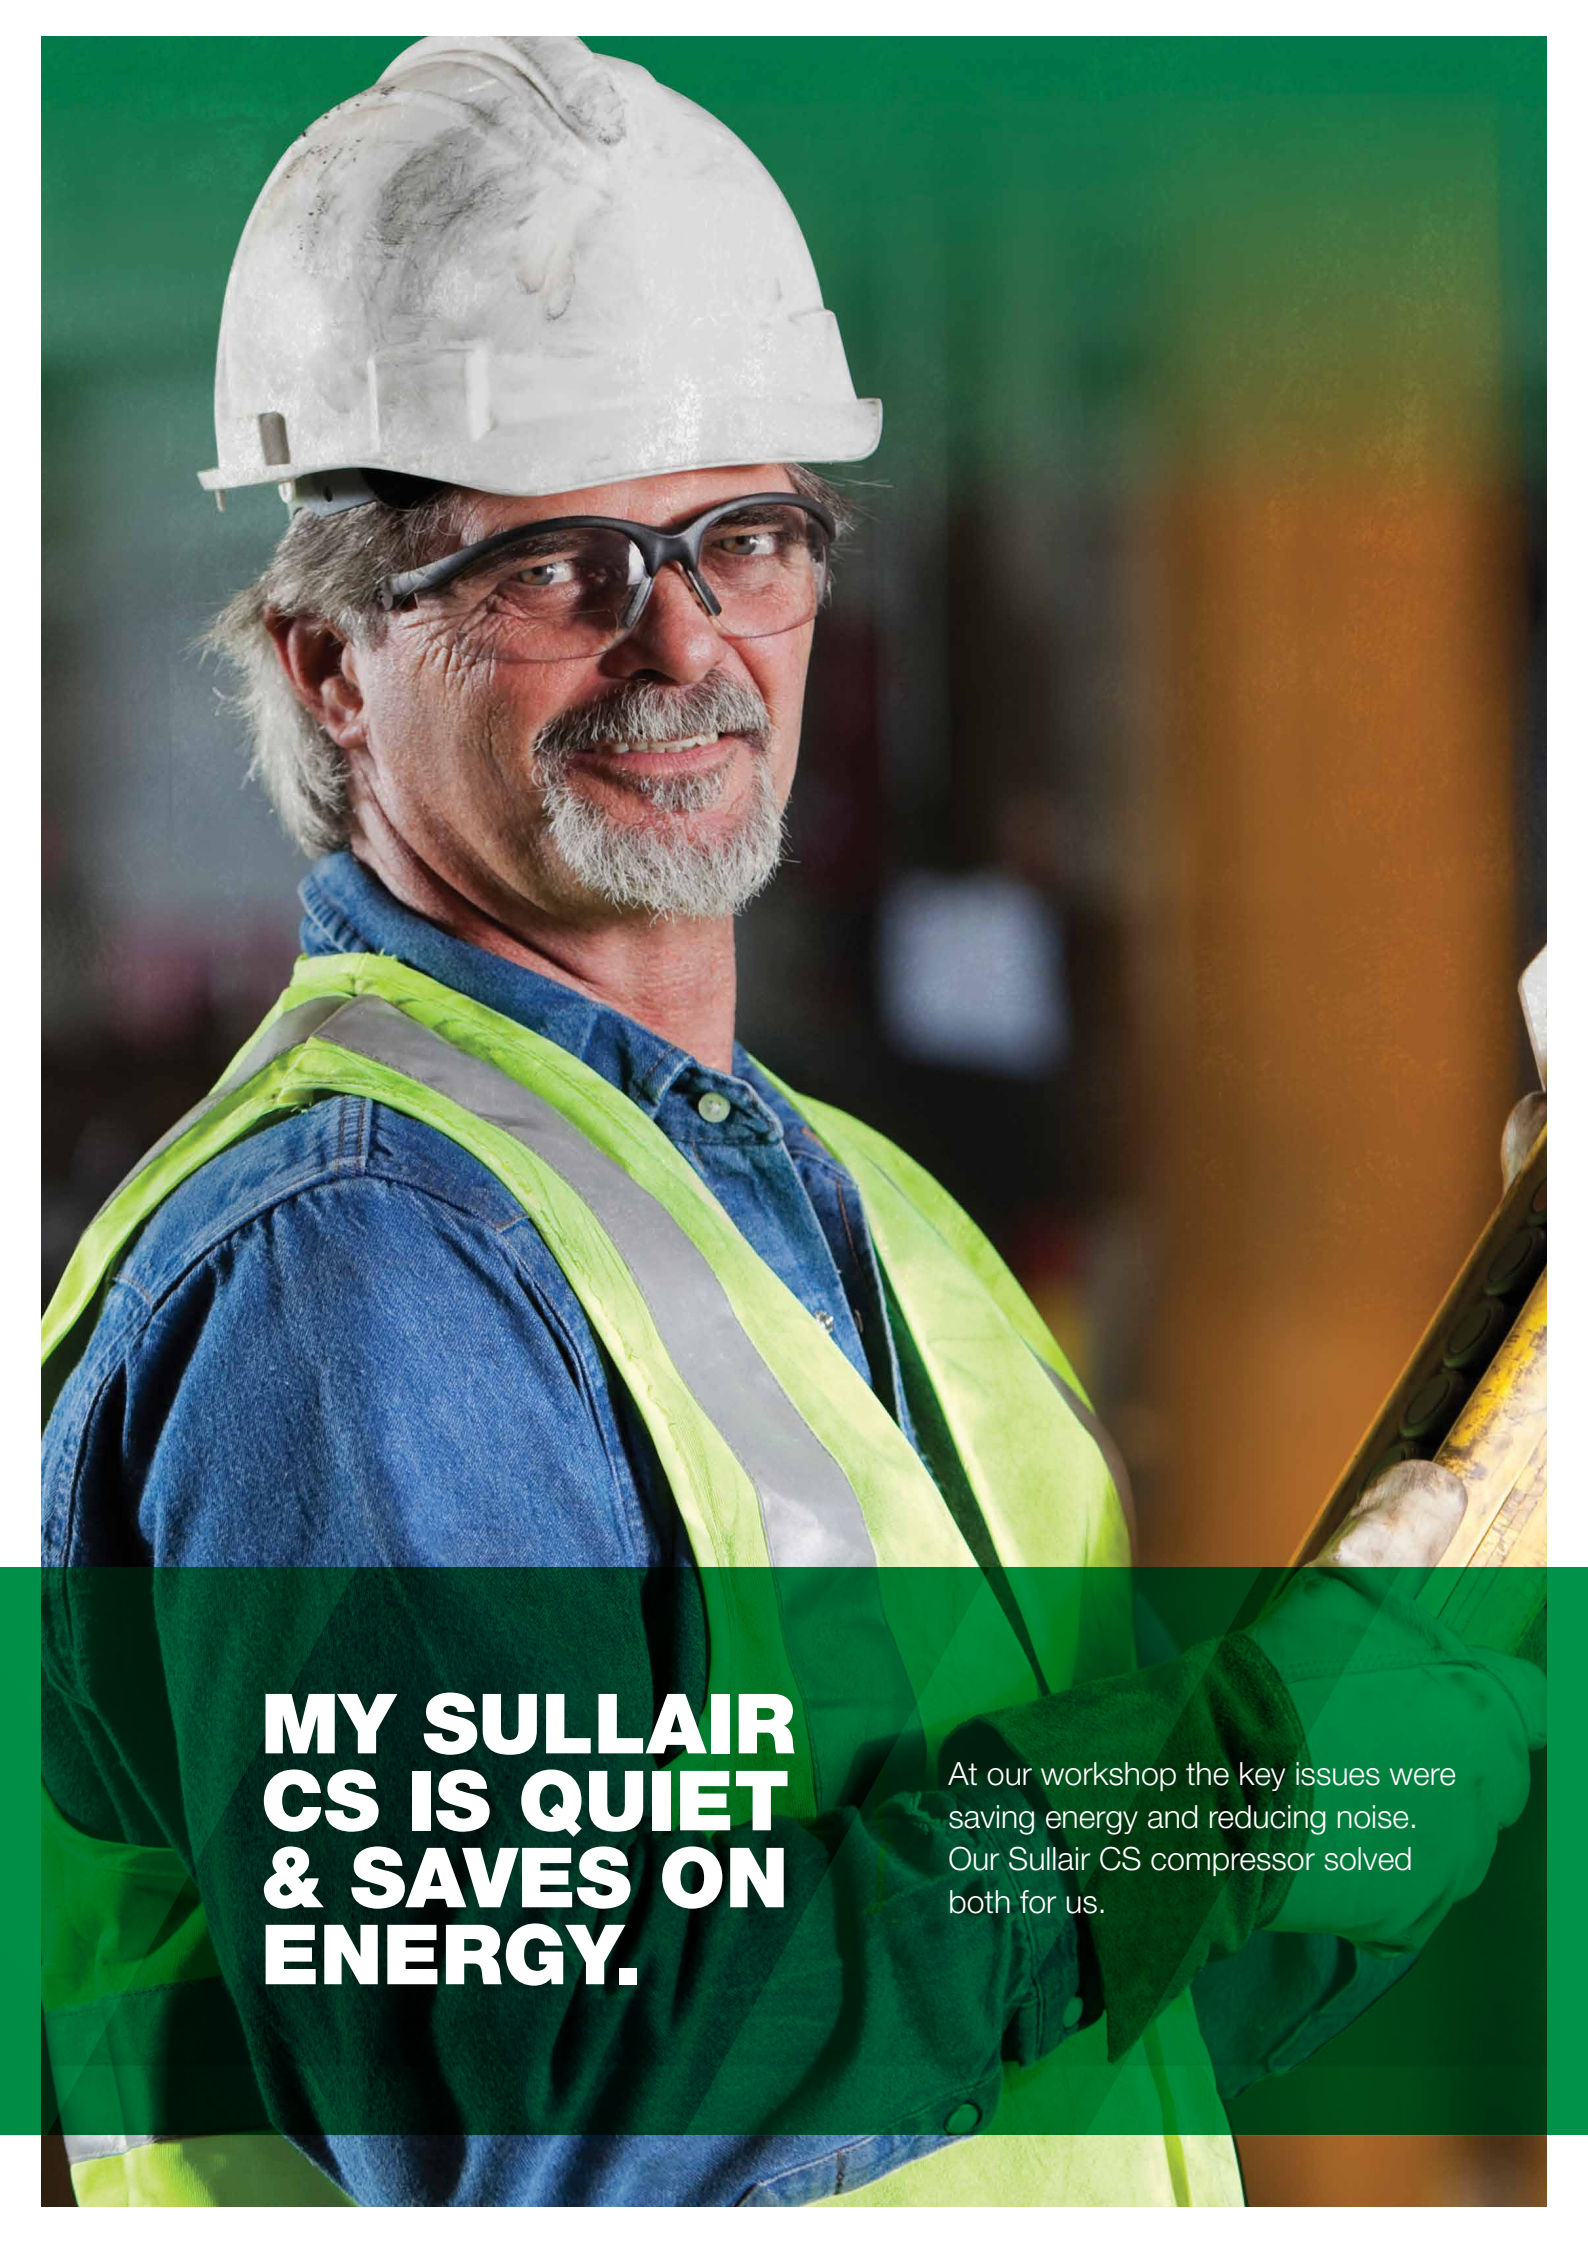

Small and compact the CS range is available in three configurations — base mounted, receiver mounted and receiver mounted with refrigerant dryer and filtration giving the complete air station.

### Easy service access

For servicing, access is only required from one side enabling the unit to be installed in even the smallest of areas. By servicing with our highly trained technicians your compressor will be maintained to factory standards with genuine parts and lubricants meaning longer life and better performance.

**Keep your compressor running like new with a Sullair Partner Care service plan. Speak to your sales specialist today.**

**MY SULLAIR  
CS IS QUIET  
& SAVES ON  
ENERGY.**

At our workshop the key issues were saving energy and reducing noise. Our Sullair CS compressor solved both for us.

**THE CS SAVES POWER AND MAINTENANCE COSTS**

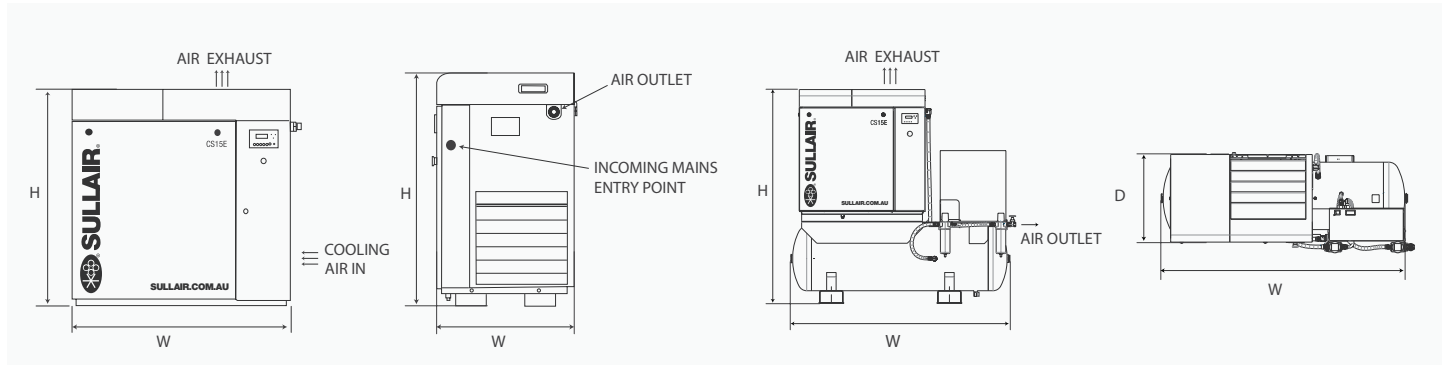

**IDEAL FOR** Manufacturing // Industrial // Food & Beverage // Automotive // Metals // Plastics // Paint & Panel Shops // Variable Load Conditions
