

Filter For Your Compressed Air System?

Needing filtration for your machine equipment?
Look no further than the Festo MS series filter regulators.

Remtron is offering you a special promotion to ensure your machinery has clean, reliable compressed air for your equipment.

Proper air treatment is critical to the health of your air system, and the Festo compressed air filters are an inexpensive investment compared to a costly repair/replacement job.

Head on into Summer this year
with your own Remtron stubbie
holder included with each unit

With Festo's large product range, highly functional components and a wide choice of services, the MS series from Festo offers a complete concept for compressed air preparation. For simple standard applications as well as application-specific solutions with the highest quality requirements.

Item Code	Size	Flow Rate	Special Offer	RRP
MSB4-1/4:C4:J1-WP	1/4" BSP	1,700 l/min	\$140.00	\$248.00
MSB6-1/2:C4:J1-WP	1/2" BSP	5,100 l/min	\$180.00	\$326.00

Consisting of manual on-off valve including silencer, filter regulator and wall mounting plate. 12 bar maximum output pressure, 40 µm filter, with pressure gauge, lockable regulator head, plastic bowl with plastic bowl guard, manual condensate drain, direction of flow: from left to right.

Solutions for every application whether you require individual components, pre-assembled combinations, ex-stock, application-specific combinations or ready-to-install solutions, our Festo configurator ensures the optimum dimensioning of every variant and the free CAD models are ideal for your planning work!

Let us know if you have specific designs and we can email you everything you need to make the right choice.
