

Optimal solutions, faster

▶ Rittal TopTherm cooling units Generation “Blue e”

Energy Savings of up to 70%

Eco Mode Control

Ri-Nano Coating

No Need for Filter Mats*

Built in condensate Evaporator (1000 Watt+)

OFFER ENDS 31st March 2019

SPECIAL PRICING OFFER

CLIMATE CONTROL

IT INFRASTRUCTURE

SOFTWARE & SERVICES

Cut costs with comprehensive energy efficiency

Benefits of “Blue e” technology in brief:

- Savings of **up to 45% energy consumption** with the same cooling output (ideally 70% compared with conventional Rittal Top Therm Plus cooling units in field trials).
- **Eco-mode control:** The evaporator coil fan cuts out as necessary, depending on the enclosure internal temperature.
- **Longer service life of components** in the enclosure and cooling units, because efficient components such as fans and compressors run at their optimum operating point.

Intelligent control with Comfort Controller:

- Digital display of the enclosure internal temperature
- Digital display of more than 20 error and alarm messages
- Push keys for easy setting and reading
- Diagnostics available via software

The Difference

- Remtron Automation trained staff will assist in calculating the correct size cooling unit using the latest Rittal RiTherm 6.3 Cooling Configuration Software.
- Cost saving in hardware size and energy consumption.

Wall Mounts			
Part No.	Cooling Output	Voltage	Price
RI3302100	300	230	\$ 1,332.48
RI3303500	500	230	\$ 1,941.95
RI3361500	750	230	\$ 2,111.12
