

Site Manager™ 3539 4G

Secure High-Availability Remote Access to Industrial Devices

\$1350 ex GST

Order Code: SEC3539PROMO Valid till 31/12/19

Easy to Set Up – Intuitive to Use

- Built-in Setup Assistant
- Single Click Configuration
- DHCP-Enabled
- Alert Capabilities Between Devices and Servers
- Security Certified and Built-In Firewall
- Unique Built-In Troubleshooting Functionality
- Intuitive User Experience

Secure Remote Access and Data Collection in One Device

The SiteManager 3539 is a robust, DIN mountable industrial gateway that you install in machine control panels to provide remote access for on-demand, real-time servicing of industrial equipment. As an additional feature, the SiteManager is capable of data collection, which allows service engineers to perform detailed cloud analysis for predictive and preventive maintenance of connected equipment.

Architecture & Key Features

Connect multiple devices simultaneously

Connect up to 100 devices of all types of industrial equipment via Ethernet, Serial or USB ports, using the equipment's native protocols (e.g. Modbus, PROFINET, EtherCAT; EtherNet/IP etc.).

Intelligent Cloud Data Collection Module

Collects data from field devices via e.g. Modbus and OPC UA, and via smart-aggregation and even triggers, pushes relevant data to popular clouds such as Azure, AWS, EcoStruxure Machine Advisor, Secomea DCC etc.

Easy & Firewall friendly Internet access

Establishes access to the Internet through the firewall of the existing wired network infrastructure, and wirelessly by 4G/LTE modem.

Persistent Store-and-forward Database

Integrated Flash memory extends the RAM based store-and-forward database to ensure data integrity for not only loss of Internet access, but also power-loss. the offline period can be further extended by inserting a SD-Flash card.

Drag & drop SCADA tunnelling setup

LogTunnel support provides static tunnel connections to a central SCADA system, which operates concurrently with other services, such as on-demand access and data collection module.

3 port Integrated Managed Switch

3 DEV/LAN ports configurable as bridged (normal switch) or individually managed ports with separate DHCP servers.
